### IMPORTANT INFORMATION

An aged coin is not always a rare coin and many do not command a great premium. Some coins less than twenty years old have a greater value than others that are a hundred years old. The three most important factors regulating the price of old or rare coins are as follows.

1st—Number of pieces minted of any certain date.

2nd.—The demand by collectors for any certain coin.

3rd—State of preservation.

The prices quoted in this catalogue are for coins in good to proof condition and means that we will pay anywhere between the low and high figures according to condition of coin. All prices subject to change without notice.

### MAILING AND SHIPPING

In sending coins to us, small lots should be sent by insured or registered mail. Large consignments by Express, Insured. We are not responsible for coins sent or returned by ordinary mail.

All inquiries must include a self addressed stamped envelope. When writing or sending us coins be sure your name and address is written plain.

### NEVER CLEAN A RARE COIN

Cleaning a coin oftentimes decreases its value, most collectors prefer them in their original condition and will pay more for a slightly corroded coin than a cleaned coin.
